📊 AUTOLINIUM - EXECUTIVE PROJECT DASHBOARD

Date: February 23, 2026 | Manager: Project Lead

Overall Completion: 20%

📅 Today's Executive Summary

Today was a critical "Foundation Day." We focused on establishing the core digital infrastructure and the visual identity of the Autolinium system. By completing these technical hurdles early, we have ensured that the system is secure, scalable, and ready for primary feature construction.

🏆 Key Achievements

- **Digital Infrastructure established:** Successfully set up the central database and interconnected it with the system's "Brain" (the backend).

- **Design System Defined:** Finalized the "Modern Retro" visual theme. This ensures the application looks premium, professional, and consistent across all devices (Desktop and Mobile).

- **Security Foundations:** Implemented the initial secure entry point for the Admin console.

- **Blueprint Finalization:** Completed a 100% comprehensive feature audit to ensure every requirement (KPIs, Attendance, Reports) is accounted for in the internal logic.

📈 Milestone Progress

MILESTONE	STATUS	DETAILS
Project Blueprinting	✅ Complete	PRD analysis & Feature Matrix finalized.
Database Architecture	✅ Complete	Data relations for KPIs and Attendance are live.
System Branding	✅ Complete	Cyan Retro design tokens & fonts configured.
Frontend Setup	🏃 In Progress	Layout construction for Admin & Employee views.
KPI Logic Engine	⌛ Pending	Automated math for salary/bonus increments.

🖼️ Visual Preview of Progress

```
Theme:              Pure White / Cyber Cyan Accents

Typography:         Typewriter / Monospace (Professional Retro)

Corner Radius:      0px (Solid, Sharp Professional edges)
```

🚀 Plan for Tomorrow

- **Dashboard Layout:** Building the navigation system for Desktop (CEO) and Mobile (Employees).
- **Attendance Tracker:** Creating the "One-Tap" check-in interface for office staff.
- **Real-time Clock:** Enabling the automated workday timer.
